Time Allowed – 3 Hours

Maximum Marks – 100

NJU

Answers to questions are to be given only in English except in the case of candidates who have opted for Hindi Medium. If a candidate who has not opted for Hindi Medium, his/her answers in Hindi will not be valued.

Question No. 1 is compulsory.

Candidates are also required to answer any five questions from the remaining six questions.

Marks

1. The XYZ Company is marketing several household consumable products. It has several branches throughout the country, which are well-connected with internet and intranet. Based on the reports and feedbacks, the company understands that the present system is not able to meet the requirements of its IS stakeholders. Hence, it wants to improve its IS performance and availability of services, to minimize its loss in terms of revenue loss, loss of reputation and to improve the customer satisfaction. It has felt the need for having reengineered business processes and implementing BCM for assessing the potential threats and managing the consequences. It wants to ensure to provide all users with a secure Information Processing environment. Further it wants to provide continuous assurance about the quality of data by employing continuous auditing technique SCARF. Hence, it engages a highly professional System Development Team to study the present system for designing and implementing a new system. The team follows and takes advantages of SDLC methods.
